EDUCATION

UC Berkeley, Haas School of Business

Diploma in Global Economic Transformation & Technology (GETT)

2023-2024

Berkeley, CA

EDHEC

Master in Management, GETT track (selective tri-continental program, ~40/cohort)

2021-2024

Paris, France

Sungkyunkwan University

M.Sc. Management Sciences (FT #1 MBA in Korea)

2022

Seoul, South Korea

Centrale Lille

Master of Engineering, Grande École (top French engineering school)

2019-2021

Lille, France

WORK EXPERIENCE

Thiga | AI Product Consultancy

Deployed AI Product Manager & Agent Builder

November 2025 – Present

Paris, France

Current mission: Canal+ | Lead, AI Product Operations (reporting to CPO; advisor to C-suite on AI strategy) / FDE

- Lead of AI Product Operations, embedded in Canal+'s product org and advise the CPO and C-suite on AI strategy and prioritization; partnered with the CPO to define the company's AI vision
- Built 2 custom MCP servers wrapping Canal+'s design system and a custom product API as tools so PMs generate high-fidelity prototypes on real components and real data contracts (not throwaway mockups) in Claude Code & Codex, and iterate to ship features faster
- Architected Canal+'s AI knowledge layer, federating 6 systems (product, design, usage, market, observability, user) via MCP, Atlassian Roov, Confluence, Figma, and Zeroheight
- Shipped 10+ production AI skills and agents adopted across PMs, designers, and analysts
- Built Figma plugins saving 1+ hr/week per designer, plus backend AI tooling (e.g., research assistant) on custom internal APIs
- Designing C-suite agent workflows for real-time team visibility; delivered build-vs-buy go/no-go to CPO

Previously at Thiga:

- Built custom agent pulling live staffing and financial data from Tableau and Google Sheets, giving mission directors and steering committee on-demand access to key metrics
- Led AI upskilling for 20-person consulting team on MCP, Claude Code, and agent building, enabling consultants to autonomously build and ship AI tools

Galadrim | Web Development Agency

AI & Full-Stack Product Manager

January 2025 – September 2025

Paris, France

- Owned end-to-end product lifecycle for 15+ AI and full-stack projects from ideation to launch
- Built internal AI tool auto-generating roadmaps from UI mockups saving several hours per project
- Partnered with engineers and designers to ship 0-to-1 AI features in ambiguous, fast-moving scopes, turning research breakthroughs into usable product

fifty-five | Digital & Data Strategy

Strategy Consultant

August 2023 – July 2024

Paris, France

- Advised AdTech and e-commerce companies on product strategy and technology adoption roadmaps
- Conducted in-depth digital due diligence on adtech and e-commerce companies, assessing product viability, market positioning and technology stacks to inform investment strategy.

PROJECTS

Hemiunu | Org-Wide AI Product Agent

2026

- Built an agent that lets a **non-technical team prototype and ship dev-ready features without touching code**. They add business/tech updates by hand through the interface, the agent grounds every build in it, then writes a new version and auto-deploys to share it.
- Made collaboration invisible: the agent **pushes to GitHub in the background** (one repo per feature), so a small team co-builds a living product without anyone understanding git
- Engineered the agent core: **MCP federation** grounding answers in connected sources (Notion, files, any server), multi-agent orchestration with cost-tiered subagents, and persistent multi-layer memory across sessions.

SKILLS

- **Product & Strategy:** 0-to-1 Product Development, AI Product Management, Enterprise AI Deployment, AI Governance, User Research, Cross-functional Leadership, Digital Due Diligence, Go-to-Market, Executive Stakeholder Management, Technical Deployment, product design, CRM, cross-functionally, business review
- **Technical:** Python, React, Node.js, SQL, Agent Architecture, RAG Systems, LLM Evaluation, Evals, MCP, Prompt Engineering, n8n, Claude/OpenAI APIs, Cursor, Claude Code, Figma, Linear, Notion, Dust, Amplitude, Clay
